

- Which parameter of php.ini file will need to be configured to allocate the memory for php script?
 A. post_max_size B. upload_max_filesize
C. memory_limit D. None of the above
- Which type of function is called by itself?
 A. Nesting Function **B. Recursive Function**
 C. Variable Function C. All
- Which are the fundamental concept of Object Oriented Programming?
 A. Inheritance B. Polymorphism
C. All D. Encapsulation
- What is the default scope of any variable and function?
A. public B. private
 C. protected D. none
- To read and write file which file mode is/are used?
 A. r **B. r+**
 B. w D. s
- Which function returns the type of variable?
(a) gettype() (b) getType()
 (c) ini_set() (d) settype()
- In PHP, which of the following function is used to insert content of one php file into another php file before server executes it
 a) include[]
 b) #include()
c) include()
 d) #include{}
- `<?php`
`echo $_SERVER['REMOTE_ADDR'];`
`?>`
 a) shows the IP address of the local system

9. How to declare constant in PHP:

Ans: `define()`

- In PHP, which of the following function is used to insert content of one php file into another php file before server executes it?

Ans: `include()`

- Difference between echo and print (chose two):

Ans: 1. echo faster than print 2. print return value

- What is the web server of PHP:

Ans: `Apache`

- Choose Variable Scope:

Ans: `Local,Global,Static` (Ans: all of the above)

- Which method applicable for larger form submission:

Ans: `POST method`

- `<?php`

```
$secretNumber = 453;
```

```
$_POST['guess'] = 442;
```

```
if ($_POST['guess'] == $secretNumber) {
```

```
    echo "<p>Congratulations!</p>";
```

```
} elseif ((300 - $secretNumber) < 10) {
```

```
    echo "<p>You're getting close!</p>";
```

```
} else {
```

```
echo "<p>Sorry!</p>";  
  
}  
  
?>
```

Ans: **You're getting close!**

- Which loop syntax is adept at looping through arrays, pulling each key/value pair from the array until all items have been retrieved:

Ans: **foreach**

- **<?php**

```
$treat = true;  
  
if(!($treat)){  
  
echo "Treated";  
  
}  
  
Else{  
  
    echo "Not Treated";  
  
    }  
  
?>
```

Ans: **not treated;**

- **<?php**

```
$value = 1;  
  
do {  
  
    $count = 3;
```

```

    $value = $value + 2;

    $value = $value * $count;

} while ($count >= 12);

echo "Value =$value";

?>

```

Ans: The output will be 9.

- What is the function of \$_SERVER[REMOTE_ADDR]?

Ans: IP Address of client.

- What is the output of substr("Bangladesh",0,6)?

Ans: Bangla

- Which function is used to read an entire file? [page-239(pdf)]

Ans: a. fread() b.readfile() c.file()

- Correct way to call/invoke a method of a class:

class name: MyPHP,

method: getDate(),

object: \$callPHP? (or something like that)

Ans: \$callPHP-> getDate ();

- Which function divide a delimited string into various array elements?

Ans: explode();

- How to read CSV file?

Ans: fgetCSV()

- Which function is used to change an existing filename?

Ans: rename();

- Which method applicable for larger form submission:

Ans: POST method

- What is descending order ?

Ans: rsort();

- ?
- ?
- ?
- ?
- ?

Adobe Photoshop

- RGB is:

Ans: Red, Green , & Blue

- PPI is:

Ans: Pixels per inch

- Drop shadow, Inner glow, Bevel are:

Ans: Layer Style (blending options)

- The tool allows you the magnify an area of the design for detail work:

Ans: **Zoom Tool**

- Photoshop native format extension name:

Ans: **PSD**

- The ____ tool allows you to select a rectangular or circular area of an layer to change or delete.:

Ans: **Marquee Tool**

- A design in Adobe Photoshop consists of multiple _____ of graphics and text:

Ans: **Layers**

- If you have a solid color to select and delete, the tool is the quickest and most effective:

Ans: **Magic Wand Tool**

- Which tool allows you to reposition an object in your layer:

Ans: **Move Tool**

- To delete a series of steps that have been used in a graphic design, you would need to use the ____ palette:

Ans: **History**

Descriptive

- **what is gradient in Photoshop ?**

ans: The Gradient tool creates a gradual blend between multiple colors. You can choose from preset gradient fills or create your own. Note: You cannot use the Gradient tool with bitmap or indexed-color images. To fill part of the image, select the desired area.

- **What is array_pop() function ?**

Ans: The array_pop() function is used to remove the last element of an array. For an empty array, the function returns NULL. Note: This function will reset() the array pointer of the input array after use

- **What are the general language features of php?**

Ans: Practicality: It allows the user to build powerful applications even with a minimum of knowledge.

Power: It has the ability to interface with databases, manipulate form information, and create pages dynamically.

Possibility: It rarely bound to any single implementation solution.

Price: It is free of charge.

- **What are class and object?**
